

Fv Train Circa 1890

1 100 EUR

Period : 19th century

Condition : Très bon état

Material : Painted metal

Description

Magnificent train on modular tracks from the French brand FV. The FV brand, rediscovered by collectors in the 2000s, was included in the great Paris toy catalog, circa 1904. The object consists of a locomotive, an open wagon and three different-colored passenger cars marked "Paris 1 ère classe Madrid". This is a train on modular rutted rails with curved rails for circle track and two straight rails for oblong track. The state of preservation is remarkable, with very fresh paintwork. Three accessories embellish the set, a mountain with tunnel, an unloading station and a guardhouse. The locomotive is marked FV on the underside. The original box is missing. On a page of the 1890 FV trains on convertible tracks catalog, this train is reproduced and titled "railroad on rails number 2". Internet source: train
