Description

Charming Napoleon III-period pocket watch holder, made of bronze with rich cloisonné enamel decoration and raised field work. The frame features a very eventful and elegant silhouette, typical of the Orientalist and Japanese taste of the late 19th century. The polychrome enamels, dominated by deep-blue, turquoise, burgundy and green tones, compose a refined floral decoration of fine decorative quality. The set base is set in a gold frame. The base encases a beautiful Brazilian green onyx in nuanced natural shades, bringing depth and luminosity to the whole. The watch-holder rests on three small turned feet and retains its upper hook designed to receive a pocket watch. The set is in the form of a watch-holder. The set is in very good condition. There are only a few traces of use and oxidation
