

Greenland Inuit Ulu Knife

300 EUR

Period : 20th century

Condition : Très bon état

Width : 13,5 cm

Height : 9,5 cm

Description

This traditional ulu knife was used by Inuit women for everyday tasks. Versatile, it was used for preparing skins, cutting meat or children's hair. Our model is distinguished by its wide, curved metal blade and caribou antler handle. The shape of the blade makes it possible to identify its origin and indicates a model from West Greenland. Greenland, 20th century. Very good condition.
