Description

Superb Louis Philippe period porcelain coffee service in the Rocaille style. This beautiful service is composed of eight cups and saucers, a large coffee pot, a sugar bowl and a milk jug. It is elegantly embellished with gold filets. The handles and necks of the pieces are harmoniously curved. The cups are embellished with floral decoration. This set is in very fine home condition, but obviously has some wear to the gilding due to use of the service. One of the cups has a discreet small brown stain on the inside. Shipping in France 40 euros, other destinations on request.
