Description

Rare and charming dinanderie vase on brass with geometric decoration. A very fine work for this vase typical of the art-deco period with its stylized geometric motifs. Gold and copper-colored striations intersect to form squares and triangles all over the vase. Beautiful brilliance. Reminiscent of the work of Christofle or Jean Dunand. Pretty curved shape. Very good condition, 17 cm high. Beautiful art-deco vase, beautiful and rare copperware technique, collector's item.
