Description

This three-shelf sideboard captivates with its sleek lines and quality craftsmanship. Carried by four square-section uprights, delicately punctuated with vertical grooves and crowned with small sculpted balls, it presents a harmonious, perfectly balanced silhouette. The trays, with their subtly molded edges, offer a smooth, warm surface, highlighting subtle veining. The whole unit rests on discreet metal castors, allowing fluid, elegant movement, true to its original vocation: serving tea, displaying porcelain or showcasing decorative objects. With its timeless charm, sobriety and delicate allure, this sideboard fits equally well into a classic interior or a contemporary setting, where it adds a touch of authenticity and refinement. *****Era: Early 20th
