

Fossils - Six Reptile Coprolites From Madagascar

150 EUR

Period : Before 16th century

Condition : Bon état

Material : Stone

Length : 4 à 14 cm

Description

A real curiosity: Series of six Reptile coprolite fossils.- Dating: Cenozoic, or "Tertiary Era": between -66 and -2.58 Million years ago. - Sites: Province of Majunga, Madagascar.- Dimensions: From 4 to 14 cm long. These biological remains were preserved in marly soils, rich in iron oxides, which compose them today as fossils. The apple, as always, serves as a scale and not as a suggestion of gustatory or culinary accompaniment.
