Depth : 15

### Description

pair of "UCHIWA III" sconces by INGO MAURER for DESIGN M Germany 1973 These iconic lights are made from genuine traditional Japanese uchiwa fans in bamboo and rice paper mounted on a minimalist black lacquered metal structure. The set perfectly illustrates the poetic and experimental approach developed by Ingo Maurer in the early 1970s, blending traditional Japanese craftsmanship and contemporary German design. The sconces diffuse a soft, warm light through the paper, creating a particularly organic and sculptural atmosphere. Very fine balance between Japonism, minimal design and wabi-sabi aesthetics. Original black wire structure and cylindrical sockets. Rice paper restored. Germany, circa 1973
