## Description

England, Circa 1800.Pair of large biscuit porcelainporcelain cookie.Decorated with reeds and antique-style friezeson a sage green background.Perfect condition.Work attributed to Wedgwood, unsigned.signed.Height 25 cm Wedgwood's major innovation, jasper or Jasperware, developed around 1775 andtruly mastered by 1777. He achieved the feat of obtaininga paste derived from basalt, but perfectly white, unglazed and suitable for polishingpolished by a lapidary. This new pebbled sandstone is brightened byby the addition of barium sulfate. Furthermore, this fine stoneware can be tinted in the bodyin the body. Unlike earlier products, the color was not applied to the surfacebut integrated into the body itself. The aesthetic principle liesthe contrast between
