Description

Ceramic bowl by Kerafina
In the center of this ceramic bowl is a circular geometric relief adorned with incised rays, surrounded by a crown of dark red ovals on a dark background. The bowl is covered with a thick, striking Fat Lava glaze, with a volcanic appearance. This type of glaze is characteristic of the expressive, textured style. The bright, brilliant scarlet color contrasts sharply with the rough, dark lava texture on the edges and inside the pattern. 24 cm wide and 6 cm high
Small traces of wear related to age and use
Mid-century ceramic art.
