Description

Elegant animal sculpture depicting a seagull in full flight diving on a fish among the waves. This particularly dynamic composition is distinguished by the quality of its modeling, the ample movement of the spread wings and its beautiful nuanced brown patina with golden highlights. The whole rests on a black oval marble base that perfectly highlights the maritime scene. The sculpture bears the signature "Ruchot" engraved on the base. French decorative work from the XXe century, in the spirit of Art Deco animal productions and the great naturalist sculptors of the first half of the century. Beautiful decorative object for a classic, Art Deco or seaside interior.
