

Sabre d'Officier De Cavalerie Legere Hussard End XVIII Siecle

2 850 EUR

Period : 18th century

Condition : Etat d'usage

Description

Light cavalry officer's saber made in Germany at the end of the 18th century. Lion-headed cap handle, column guard, spiked auricles. Leather fusee with original watermark. Beautiful 83.5 cm hollow-panel blade with original engraving and gilding near the guard. Basane-covered wooden turret with three brass fittings decorated with traits, brass saddles also worked with traits. Presence of an olive to allow carrying on the gusset or a protective cover. Restoration of the scabbard can be seen in the photos: the scabbard has retracted and the saber has difficulty fitting into the scabbard over the last 3 cm, which suggests that the saber has long been presented outside the scabbard, resulting in a blade in good condition for a saber of this era. The scabbard is in good condition for a saber of this era.
