

Portrait Of A Man Wearing A Turban - Orientalist Academic Drawing, 19th Century

1 700 EUR

Period : 19th century

Condition : Bon état

Material : Paper

Length : 49

Width : 34

Description

A splendid and powerful charcoal and graphite drawing on paper, depicting a bearded man wearing a turban, with an intense and penetrating gaze directed toward the viewer. This academic work fits perfectly within the 19th-century Orientalist movement. The interplay of light and shadow, which sculpts the facial features and the complex folds of the drapery, attests to great technical mastery. The artist succeeds in capturing an expression of rare psychological power, combining pride and gravity.
