Description

Gilt bronze plaque, mounted on a small base, depicting a bas-relief.

The name Trémois is engraved in the lower left corner of the plaque. Pierre-Yves Trémois (1921-2020) was a French artist renowned for his work in drawing, sculpture, and engraving, blending the human body, animals, and scientific imagination.

A profile of a human face, with idealized features, symbolizing intellect fused with the human head, and a stylized, finely detailed crustacean.

This juxtaposition of man and insect is typical of Trémois, who enjoyed exploring the duality between the human and the biological world, the natural and the unusual. Numbered work.
