Belgian, born in Liège in 1921 and died in 1989,Alexis Keunen placed himself at the center of his attention, devoting it entirely to his destiny.He possesses the gift of focusing his inner energy on objects that offer him metaphysical or poetic possibilities.In his paintings, space possesses a quality that suggests the "existing" object is also called, beyond its mere existence, to signify and to be.We are in a universe where things interact beyond the logic of their material substance.Numerous exhibitions in Belgium, Italy, the Netherlands, France, Germany, and Morocco.
