accented with diagonal striations. Straight blade, with a regular, straight, and well-defined hamon, featuring a beautiful undulating pattern of the gnomemidare or notare type. The tang has two perforations and is signed Yamamon Tadaaki. Sold with its silk carrying case. Dimensions: 44 x 5 x 3 cm. Blade length: 41 cm. Notes : For the samurai, foaming waves symbolize the indomitable force of nature and the perpetual movement of existence. Like the waves that ceaselessly crash against the rocks, the warrior must demonstrate resilience in the face of trials. The foam, fleeting and ever-changing, also serves as a reminder of the impermanence of all things. Thus, contemplating the foaming waves invites the samurai to cultivate both determination and a serene acceptance of fate.
