Description

A richly decorated bone snuffbox with an inlay in the center of the lid--a tiny silver or pewter plate bearing the effigy of a king.I prefer to date it to the 19th century.In any case, this is a very original and rare snuffbox, and the red and black chatrons decorations are particularly striking.It should be noted that the second copper hinge is either missing or oxidized, but this does not interfere with the opening or closing of the lid
