au bout du fût

Description

A rifle cane...Made of wrought iron with a horn handle...In good condition...!I'm not very familiar with this type of object because it's not very common...I think some parts are missing...!Of French origin...Perhaps from Saint-Étienne...?The shaft had a black primer coat...Otherwise, it's not bent...The handle unscrews easily...Dated to the 1870s/80s...Weight... 428 gr
