

Pair Of Candleholder-style Wall Sconces In Bronze And Gold-plated Brass With Glass Globes

780 EUR

Period : 20th century

Condition : Bon état

Material : Brass

Height : 98

Description

Pair of Wall Sconces in a Melted Candle Style
Bronze and gilded brass with engraved glass globes
A striking pair of decorative wall sconces reminiscent of large candle torches. Each sconce features a cylindrical shaft resembling a candle covered in melted wax, mounted on a bronze and gold-plated brass frame. The top is crowned with a spherical globe made of satin-finished glass engraved with floral motifs, diffusing a soft and warm light. The highly realistic dripping wax design lends the piece a theatrical quality reminiscent of Renaissance-style lighting fixtures or castle interiors. The circular wall plates and the turned gilded metal elements lend elegance and refinement to this pair of large decorative wall sconces. Condition In good overall condition and appears to be in working order. Some signs of use
