Divergent Strabismus - Anatomical Wax Model Of The Eye, Circa 1900

1 200 EUR

Period : 19th century

Condition : Très bon état

Material : Wax

Height : 37 cm

Description

A rare anatomical study depicting divergent strabismus, created around 1900.The face is made of polychrome papier-mâché with wax applications, mounted on fabric and featuring glass eyes. The divergent eye deviation is particularly expressive and reflects an educational intent to illustrate this eye condition.The piece is presented in its original oval frame made of blackened wood, under a Napoleon III-style domed glass cover.A unique object at the intersection of medical education, the history of ophthalmology, and the cabinet of curiosities.Late 19th century - early 20th century.Dimensions:Height: 37 cm.A beautiful collector's item, ideal for a cabinet of curiosities, a medical history collection, or a lover of ancient anatomy.We deliver and ship worldwide.
