

## Old And Rare Small Enamel Sign Advertising

250 EUR

Period : 20th century

Condition : Parfait état

Diameter : 55 mm

### Description

"Castrol Patented" plaque, intentionally domed, with original mounting hole in the center. These small plaques were attached to the base of largeenameled sheet-metal promotional thermometers for garages (see thephoto for an example of the hole at the base of a large thermometer) They come from a former Castrol oil sales representative, which explains their condition, and today they are prized collector's items. Condition is near-mint despite their age (circa 1950). Diameter: 55 mm
