Description

Pair of antique candlesticks, restored in patinated and gilded bronze. The baluster-shaped shaft, decorated with gadroons, rises from a double wreath of water leaves and is accented by a fluted band supporting the candle holder, which is adorned with foliage. The ensemble rests on a circular base chiseled with acanthus leaves. (The underside of one of the bases bears the number: 2021.) The original brown patina and gilding are in very good condition.
