

Carved And Gilded Wooden Barometer-thermometer - Louis XVI Period

1 400 EUR

Period : 18th century

Condition : Bon état

Material : Gilded wood

Diameter : 56

Height : 84

Description

A Parisian medallion-shaped barometer-thermometer, made of richly carved and gilded wood. It features a design of garlands, foliage, ribbons, and a row of pearls surrounding the dial. The openwork pediment is adorned with ears of grain and small flowers, in the characteristic style of the Louis XVI period. Signed "Magard à Paris," this model is equipped with its original mechanism, including the mercury tube, the plunger, and the counter-plunger, all in working order. Good overall condition. A few small areas where the original gilding is missing and a very slight misalignment of the blue-backed oculus indicating the various barometric conditions relative to the dial (see photos). Work from the Louis XVI period, last quarter of the 18th
