900 EUR

Period : 19th century

Condition : Très bon état

Material : Porcelain

Diameter : 30

Height : 70 (89 avec socle)

Description

This beautiful Japanese vase consists of three parts: the body, the neck, and the base. On the oblong body, two lively park scenes are depicted, featuring three young women and a man, all very well dressed. Exotic birds flit among them; others are perched at their feet, including a magnificent peacock with a green tail and a proud rooster. In the background, a small temple stands out on a hill, beyond a stream. Two "endomorphie" gilded handles and a ring complete the decoration. The neck, which is very flared and dynamic, features an exclusively floral design on a speckled black background. The dividing element is a "coral" cord. The base, also flared, features the same design. The dividing element is a frieze of stylized "coral," green, and blue motifs. Our vase can be placed on a five-legged pedestal, included,
