

Educational Signage Panel For Railways

800 EUR

Signature : Lucidus

Period : 20th century

Condition : Bon état

Material : Metal

Width : 45

Height : 70

Description

Rare "Lucidus" railway instructional sign --early 20th century
Exceptional demonstration panel from the famous Lucidus company, a French manufacturer renowned for its railway and electrical signaling equipment. This educational display was used to explain the internal workings of a railroad signal light through its visible components: projector, resistors, original wiring , electrical contacts, and controls. The illuminated arrows at the bottom illustrate traffic signals, while the upper light represents the main signal.
