

Crystal Stair Or Handrail Ball On A Brass Base

280 EUR

Period : 20th century

Condition : Parfait état

Material : Crystal

Description

Cut Crystal Stair or Handrail Orb on a Brass Base - 20th Century
Description
Elegant staircase or banister finial made of cut crystal, mounted on a polished brass base, a 20th-century piece. Crafted from thick, high-quality crystal, this ball features a refined cut alternating between large cabochon facets and a star-shaped and floral motif finely engraved. The quality of the cut highlights the transparency of the crystal and creates a stunning play of light. The sober and elegant brass base harmoniously complements the piece. Originally intended to crown the top of a staircase banister, this ball can also be repurposed as a decorative element in a classical or contemporary interior. The piece is in very good condition, with no cracks or chips, and features a beautiful patina on the brass consistent with its age. Period: 20th
