Description

Charming vase decorated with blue columbines by Gallé. I have rarely seen such an intense blue on a Gallé glass piece. Beautiful columbines fully etched with acid on a lemon-yellow background. Curved shape with a slightly flared neck. This is an extremely luminous piece with intense colors, as the photos attest. 12 cm tall, 9 cm in diameter, in perfect condition, signed on the side, circa 1910. A little gem of glasswork, with exceptional colors.
