Description

Elegant antique ring in 18-karat yellow gold (750 ?), fully hallmarked, adorned with a rectangular cameo in two-tone agate (warm orange background, milky white relief), finely carved. The cameo depicts a bearded male profile in the ancient style, rendered in a Greco-Roman-inspired neoclassical style, evoking a mythological or heroic figure from Olympus, in keeping with the classical aesthetic that was very much in vogue in the 19th century. The stone is highlighted by a rounded prong setting, characteristic of the refined mountings of this period. The delicately crafted openwork setting features shoulders adorned with gold medallions, lending the piece elegance, lightness, and visual balance. Characteristicso
