Description

A lovely vase decorated with Japanese anemones by Gallé. This richly decorated vase features very beautiful colors, entirely acid-etched to reveal pink and red anemone flowers that shift in color depending on the viewing angle. The design stands in stark contrast to an intense honey-colored background, a hallmark of high quality in Gallé's work. A lovely round shape on a small foot with a slightly flared neck. In perfect condition, 14.8 cm tall, 11 cm in diameter (quite bulbous), signed on the side, circa 1900. A very lovely piece with vibrant colors!
