

Aquamarine - Crystal - 4.5 Cm - Gem-quality

1 200 EUR

Period : 20th century

Condition : Très bon état

Material : Precious stone

Length : 11

Width : 10

Description

A rare 4.5-cm aquamarine crystal of exceptional purity, elegantly set in its orthoclase (feldspar) matrix with a few quartz crystals. Crystals of this gem-quality are regularly removed from the matrix (or break) during extraction, often to be cut (for jewelry); finding large, transparent crystals still in their natural setting is therefore quite difficult ! Origin : Pakistan, then private collection. Overall dimensions: 11 x 10 cm. Weight: 700 grams. Photos taken in natural light.
