Description

A lovely and rare opaline vase decorated with birds on apple tree branches, by BACCARAT. Truly a beautiful piece, finely enameled with a design of birds on apple tree branches. Note the vivid and varied colors against this ochre background and the contrasting white apple blossoms. You can also recognize this "moon" or medallion, typical of the illustrious crystal manufacturer's production (a clearly referenced model; see last photos). The finesse speaks for itself. A beautiful ovoid shape on a small foot; each vase bears the number 11 on the underside of the base. Height: 26.5 cm, in remarkable condition. Please note that I own a second vase that forms a perfect pair with this one, and the buyer will be given the opportunity to purchase the matching piece under the same
