Neo-romanic Floor Lamp Made Of Solid Bronze With An Archaeological Green Patina, 1950s

750 EUR

Period : 20th century

Condition : Très bon état

Material : Bronze

Description

An impressive Neo-Romanesque floor lamp from the 1950s, crafted from solid bronze and adorned with a rich, archaeological-green patina that gives it the appearance and character of an ancient bronze artifact.Its slender silhouette draws inspiration from Romanesque and medieval decorative arts, reinterpreted through the refined historicist taste of the mid-20th century. The generous use of solid bronze lends the floor lamp remarkable quality and a sculptural presence, while the green surface--deliberately aged--emphasizes its architectural character.The archaeological-style patina, with its varied shades of green, was designed to evoke the natural oxidation of unearthed ancient bronzes, creating a particularly striking contrast between the design's classical inspiration and its 1950s
