

Hispano-moorish Earthenware Dish With A Central Indentation, Seville, Late 15th Or Early 16th Century

2 500 EUR

Period : 16th century

Condition : Bon état

Material : Earthenware

Diameter : 31,5 cm

Description

Round dish with a barely noticeable center indentation, made of earthenware with a metallic sheen featuring yellow lustre and blue pigment; the center is decorated with a five-petaled flower surrounded by a blue border between bands of lustre, followed by a pseudo-epigraphic band; on the rim, a background of flower buds alternating with solfas, large three-lobed leaves in relief alternating with six simple leaves. On the reverse, numerous concentric circles. Original hanging hole. Hispano-Moorish, Spain, Seville. Late 15th or early 16th century. Diameter: 31.5 cm. Crack at 11 o'clock and touch-up of enamel with marli near the blue border.
