Description

Set of antique amethyst jewelry (half set) in yellow gold, late 19th century. A collection of amethyst jewelry including an 18-karat gold ring set with a rectangular stone, approximately 10 mm wide, P cut, total gross weight of approximately 3.1 g, as well as a hexagon-cut amethyst brooch made of unhallmarked yellow metal, whose surface analysis indicates it is 9-karat gold, approximately 57 mm long with a hinged clasp, and a pair of dangling amethyst earrings set with round and pear-shaped stones, made of unhallmarked yellow metal, approximately 18 mm long with hooks, with a combined gross weight of approximately 6 g, all presented in a custom-made jewelry box. Other details: all stones are present and intact; a few scratches on the amethyst in the ring; slight
