Description

DARS703 - This pair of antique balustrades stands out for its austere elegance and the quality of its carving. Crafted from solid walnut, it features a rhythmic sequence of turned columns interspersed with capitals carved with floral motifs. At the ends, the posts are embellished with full-relief carved figures, featuring stylized faces and bodies that evoke anthropomorphic elements. The wide, molded top rail lends the piece solidity and serves a structural as well as an aesthetic function. The final 40 cm culminate in a flag-shaped section, creating a hinged section of the balustrade designed to be folded down when necessary. Origin: Piedmont. Date: 16th century. Dimensions: W 180 x H 79 x D 20 cm
