

15th-century Carved Stone Architectural Element

160 EUR

Period : Before 16th century

Condition : En l'etat

Material : Stone

Width : 15 cm

Height : 22 cm avec le socle, 15 cm sans

Depth : 13 cm

Description

A fragment of carved stone, mounted on a metal base that allows it to rotate. This object was likely part of a door or fireplace surround. It depicts two acanthus leaves joined by what appears to be a stylized fruit. A molding is visible on one side.
