

Baoulé Mask, Ivory Coast

1 400 EUR

Period : 20th century

Condition : Etat d'usage

Description

Baoulé mask, from the Akan group, made of blackened wood; a portrait mask that is unique for its small figure at the top, likely representing a well-known and revered ancestor--perhaps of small stature--with the beard symbolizing wisdom! Beautiful shiny black patina, very delicate and minimalist carving, perfectly balanced like the finest Baoulé masks--truly great art! Height 40 cm not including the base, still part of my beautiful collection of prestigious objects currently for sale!
