Description

Pair of Molded Crystal Pedestal Bowls 20th Century
Elegant pair of molded crystal pedestal bowls, each resting on a flared circular foot. The wide, shallow bowls are richly decorated with geometric diamond-point and crosshatched patterns. Their rims are embellished with a succession of rounded lobes forming an attractive scalloped border. The stems repeat the same diamond-pattern decoration and feature vertical fluting. Each stem flares towards a lobed base, providing excellent stability. The crystal displays fine clarity and produces beautiful plays of light and reflection. These refined and decorative pieces may be used as fruit bowls, dessert stands or table centerpieces. Period: 20th century
Material: molded crystal
Decoration: diamond-point and crosshatched patterns, fluting
