

14k Gold Ring With Tanzanite (3.58 Ct) And Diamonds

1 220 EUR

Period : 20th century

Condition : Bon état

Material : Gold

Description

A sculptural ring in 585 (14-karat) yellow gold, featuring a central oval tanzanite and a sumptuous arrangement of diamonds. The 3.58-carat tanzanite, with its rich blue-violet color and striking pleochroism, is set at the center. The stone is highlighted by an openwork structure, allowing for optimal light diffusion and enhanced color depth. It is surrounded by 82 pavé-set diamonds, which accentuate the size of the center stone and create an intense, continuous sparkle. The ring bears the manufacturer's hallmark and has been tested by the Lithuanian Gemological Institute. Tanzanite is a rare gemstone found exclusively in Tanzania. It is prized for its unique color and limited supply. ONE EXCEPTION ONLY Dimensions: Ø 17.19 mm (54) Country of origin: Belgium Period: circa 2000-2010 Metal:
