Description

Art Deco vase, signed Moser Karlsbad, made of faceted amethyst-colored crystal from the Bohemian crystalworks. Moser vases represent the absolute pinnacle of Bohemian crystal, renowned worldwide for their eco-friendly, lead-free luxury production and for the iconic colors created using metal oxides and rare earth elements. The signature "Moser Karlsbad" below, set within an oval, confirms the authenticity of the manufacturer's classic style. This specific mark historically places the vase in a golden age, spanning primarily from the 1910s (approximately 1911-1915) to the late 1930s. The Amethyst color is one of Moser's historic and most prized hues, originally achieved through the addition of manganese oxide. Under natural light, this deep purple takes on warm, iridescent hues. It
