Necklace Made Of Silver, Vermeil, Enamel, Garnet, And Pearl

290 EUR

Period : 20th century

Condition : Bon état

Material : Sterling silver

Length : 49 cm

Description

Silver necklace featuring a richly detailed pendant--partly vermeil--combining polychrome enamel, garnets, and a dangling pearl, attached to a silver chain. The pendant features an oval cabochon garnet set in a bezel setting at its center, surrounded by an elegant star-shaped motif in white and green enamel. The relief design, finely chiseled and accented with small metallic beads, is enhanced by golden touches of vermeil that lend warmth and refinement to the piece. A small faceted red stone accentuates the lower part of the motif and harmoniously extends the composition to an elegant dangling pearl. Very good condition. Dating from the mid-20th century, the pendant is not hallmarked; the chain is hallmarked 925. Dimensions -Weight: 21.4 grams.Length: 49 centimeters.Chain width: 1.66
