Description

RARE Vacheron Constantin pocket watch - STM25VAC001
Functioning watch This watch is rare and sought after by watch collectors all over the world for its reputation for high-quality watchmaking ---> VACHERON CONSTANTIN
Its dial is original and unmarked with the brand name, as was very common at that time. The dial shows slight imperfections in the center, which are still acceptable. The hands are original and still in full working order. It features a vintage case with a beautiful engraving on the back; the setting stem has been re-drilled, indicating that the case was fitted with this watch at a later date... Nevertheless, it's a beautiful set, with all parts from the same era ... For your information, this movement is in working order; it has been serviced, but it is sold without a key.

This purchase is not suitable for a beginner. It works, but obviously there is no guarantee of long-term accuracy for a watch like this. No warranty regarding the balance spring; it is functional, but it is not NEW. You must manually remove the time-setting stem (the spring is too weak); winding the spring is not optimal--it must be done in several stages. Dimensions Thickness: 18 mm Case: 45 x 70 mm (including bezel) Fast and well-protected shipping SHIPPING WORLDWIDE
