Description

A beautiful, vintage car figurine by René Lalique, "Coq Nain." An older model made of white glass (not crystal) created by René Lalique in 1928. A bronze mount glued to the base. The rim of the glass base has been ground down, presumably to conceal an old chip. Unfortunately, this process resulted in the loss of the original signature, which had been molded in relief. Height: 22.5 cm
Height without bronze: 21 cm
