Description

An elegant blown stem glass raised on a circular foot with a rough pontil mark. The tall stem, cut with seven facets, incorporates a striking latticino twist composed of red and white enamel threads. The base of bowl is finely shaped like an open flower. The bowl is wheel-engraved with a continuous landscaped decoration depicting two palaces, stylized trees and game animals. The rim is enhanced by a delicately engraved border, adding refinement to the composition. Attributed to Bohemia or Silesia and produced for the export market, this piece displays a high level of craftsmanship. A scarce and attractive model, it combines fine engraved decoration with the visual appeal of a coloured latticino stem. Dimensions: 17.5 cm high; 6 cm
