Description

Polychrome opaline and gilded bronze. A pair of wall sconces, each with two lights, crafted from polychrome opaline and gilded bronze. Their refined decoration of painted bouquets of flowers on an opaline background reflects the French decorative taste of the second half of the 19th century. The composition harmoniously combines the delicacy of the floral opaline with the richness of the gilded bronze, adorned with finely crafted decorative motifs. The overall forms are inspired by the Charles X aesthetic, characterized by classic, elegant, and softened lines, inherited from the decorative tradition of the Restoration. The piece features a refined and balanced silhouette, typical of decorative lighting fixtures designed for the elegant interiors of that period.
