Description

Pair of Art Deco walnut armchairs, Spanish-inspired - circa 1930A beautiful pair of walnut armchairs dating from the first half of the 20th century, circa 1930, featuring an elegant, Spanish-inspired Art Deco design. These armchairs are distinguished by their simple, architectural construction. The wide, rectangular backs are decorated with two molded panels in slight relief, lending the pieces a great deal of character. The straight armrests rest on slightly curved posts, while the square base is reinforced with crossbars, giving the armchairs excellent stability and a particularly balanced silhouette. The seats are upholstered with beautiful traditional straw padding arranged in a star pattern, whose light hue contrasts pleasantly with the warm, deep patina of the walnut. A
