Description

A rare and important gaiac chest of drawers, a piece crafted in Saint-Malo, featuring a slightly scalloped shape, rounded legs, and paneled sides; it is topped with a tabletop featuring a corbin-beak edge, with three drawers in three rows, separated by wide dividers, the drawer fronts are fully molded, evidence of high-quality craftsmanship, as are the sides. This beautiful Saint-Malo chest of drawers is presented with elegantly cut brass ornaments that highlight this exceptional and rare seaport chest of drawers.... The selection of this rare guaiac wood is also admirable; this rare piece of furniture--likely a custom order--is in excellent condition and features a beautiful wood patina.
