Description

This Jumo desk lamp, attributed to Eileen Gray, stands out for its architectural silhouette and ingenious articulation system. The design combines a swiveling, elongated shade--upholstered in midnight blue faux leather--with an adjustable chrome-plated metal frame. The dual-arm system allows the height and angle of the shade to be adjusted to direct the light with precision. The heavy, perfectly proportioned base ensures the lamp's stability while extending its style: a midnight blue top, polished metal, and geometric lines come together to create a decidedly modernist aesthetic. The slender structure, the interplay of joints, and the clean lines of the form all reflect a design in which functionality becomes a true aesthetic element. The mechanism is not

concealed; it plays a full part in the piece's sculptural character. With its sophisticated and timeless look, this lamp is a remarkable piece of vintage design, particularly well-suited to a contemporary interior. Eileen Gray (1878-1976) was an Irish architect and designer. She is best known for her modern furniture and innovative architecture. Based in Paris, she was notably associated with the Modernist movement. Among her famous creations are the E-1027 table and the Bibendum armchair. She also designed the E-1027 House in Roquebrune-Cap-Martin, France. Her work is characterized by simple, functional, and elegant forms. Jumo is a company founded in 1948 in Fulda, Germany, by Otto Moritz Juchheim. It began by manufacturing temperature-measuring instruments. Over the years, Jumo expanded its operations into automation, control, and measurement systems for industry. Today, the company operates in many countries and offers solutions for monitoring temperature, pressure, liquids, and other industrial parameters. *****Era: 1950 Electrical system has been refurbished and is fully operational Good condition Shipping available upon quote in France and internationally Dimensions: Width: 33 cm Depth: 15 cm Height: 50 cm Part number: 703V
