

Pair Of Quartz Spheres On Custom Bases

200 EUR

Period : 20th century

Condition : Très bon état

Description

The pair consists of two white quartz spheres, carefully polished to highlight their soft, milky surface and natural indentations. The stone has a delicate translucency, marked by natural veining and inclusions that make each sphere slightly different from the other. Quartz is one of the most common and, at the same time, most fascinating minerals on Earth: its crystalline structure is the result of extremely slow geological processes. The white variety, often referred to as milky hyaline quartz or milky quartz, owes its characteristic appearance to the microscopic inclusions and irregularities within the crystal, which scatter light, creating that soft, almost opalescent effect. Dimensions including the base: Sphere 1 --> H: 19 cm Diameter: 10.2 cm Weight: 1.37 kg Sphere 2 --> H: 14.4 cm Diameter: 6.9 cm
