Description

EXTREMELY RARE DUMONTHIER
Rifle-Style Blowgun, 19th Century, 7 mm Caliber
- Category D Firearm (No Permit Required)
Extremely rare breath-activated firing
mechanism!DUMONTHIER 1867 SystemJust
like a blowgun, the force of the breath propels the
firing pin into the base of a black powder
cartridge!The pommel unscrews to reveal a seal
and a concealed tube that activates the firing
pin.In good overall condition--the movable firing
pin is present and intact.Bears the manufacturer's
mark "E.L."--with a mirrored "E" resting against
an "L"; see photos of the engraving--most likely a
trademark registered by DUMONTHIER in
1867.This firearm is available for unrestricted
ownership; if you are of legal age, you may
purchase it. A valid ID check will be required at

the time of sale. Please note: the buyer is not permitted to carry this cane outside their home, and this firearm must not be kept in a vehicle. No ammunition for sale. The firing pin is in good condition, and the smoothbore barrel is in excellent internal condition. The firing pin's travel is long; the back of the firing pin cannot be removed from the butt plate--obviously to prevent the recoil from hitting your teeth... The barrel is coated with black lacquer, as-is, with some chips; see photo. The stock is sturdy and in good condition, complete with its movable ferrule, which is in good condition. The metal parts are made of bronze and covered with bamboo wrappings; they are in good condition. The shaft is straight and sturdy enough for walking... Total length 88 cm; barrel length (including chamber) 55 cm Internal diameters (muzzle and chamber): 7 mm to 7.5 mm I do not sell ammunition--weapons may be shipped greased to prevent oxidation between the time of sale and delivery. This firearm has not been tested; it is up to the buyer to do so if they wish. WE assume NO LIABILITY whatsoever for the use of this firearm! Clearly, the mechanism (without a cartridge) is fully functional... Fast and well-protected delivery SHIPPING WORLDWIDE
